Or

Attempt a precis of the following passage :

In films, sound effects play the part of words. For example, the sound of footsteps followed by the slam of a door are phrases that carry a certain amount of information. Once the sounds are prefaced or followed by a line of dialogue, the 'sentence' is complete. We know who is performing the action, and why, and a clear picture is formed in the mind's eye. Sound effects also play the part of words when they set a scene or establish the mood—a function often performed by music. They may even serve as figures of speech or metaphors; a character in drama. In radio, as in film, fade-outs and fade-ins form part of basic grammar. Such devices may be used simply as punctuation, to mark time lapse or a change of location. Their most valuable function, however, is not to punctuate, but to add perspective to a scene. By gradually increasing or diminishing the volume of sound, for example, a producer can create the illusion of movement in space.
